

STEP
01

WHY MAKE THE MOVE ?

- We are evaluating consolidating data centers
- Our roadmap outlines moving on-premise solutions to the cloud
- We have outsourced conference solutions that require additional hardware and limited employees to calls with four or fewer participants with complicated bridging services
- Our company's environmental initiatives to reduce energy cost and go paperless

“
M365 offers something for everyone

STEP
03

WHAT DO WE GET ?

- Microsoft 365 allows the latest versions of Office 365+ Windows 10 with enterprise mobility and security
- Video conferencing solutions with Teams and Skype help reduce teleconference and travel cost
- Embed Power BI reports into SharePoint for team's quick access
- Efficient process workflows with Microsoft Automate
- SharePoint homepages for internal access to materials like company newsletters, calendars, team pages tools and bookmarks

“
Users are more likely to accept introducing other new offerings

VP OF TECHNOLOGY AND INFRASTRUCTURE

Deciding when to move the company to M365

STEP
01
WHY MAKE THE MOVE?

STEP
02
WHO WOULD BENEFIT ?

- M365 offers built-in privacy, transparency and enhanced security and user controls to meet the requirements of security and compliance departments
- Our company will benefit as we will reduce cost and go green by going paperless and reducing energy cost by eliminating the use of servers
- Our employees will get the latest versions of Office 365 products and Windows 10 allowing additional collaboration between teams

STEP
03
WHAT DO WE GET?

STEP
04
NEXT STEPS

- I'm ready to get started with an assessment on making the move to M365
- I'm drawing up a high-level roadmap for the IT infrastructure
- I need to create a high-level expectation company-wide about the transformation
